Video Microscopy Tutorials

Video Microscopy Tutorials are small group sessions that give participants a chance to interact with experts in the field. The duration is 90 minutes with no intervening break. The sessions provide the participants an opportunity to discuss topics in a less formal group and examine interesting cases using a video microscope projected with an HD camera and projector; similar to cases being reviewed in the hospital on a multi-headed microscope. It is suggested that the Video Microscopy Tutorial presenters have an abundance of glass slides and take home points. If a PowerPoint presentation is utilized, it should be less than or equal to 25% of the allotted time. This session format is best with one speaker and one speaker is eligible for honorarium. The room will be set with the following Audio/Visual Equipment:

- Each session has a laptop (PC) - Please load your presentation at least 20 minutes prior to your session. If you are using a MAC, you must bring your own computer and adaptors.
- Podium and microphone
- 1 Laser Pointer
- 1 Screen
- 1 Video Microscope
- Switcher to flip between the microscope and PowerPoint slides
- NOTE: Wifi is not available unless requested
- If you have made a specific request for additional A/V, you will be contacted.

Other Requirements for Video Microscopy Tutorials

- **Self-Assessment Modules (SAMs) questions** are required for Video Microscopy Tutorials. The ASC is audited by the American Board of Pathology for quality SAMs; therefore, the ASC asks each speaker to take time to develop their questions according to ABP guidelines. You can find these guidelines under the SAMs Questions link on the ASC website.

  SAMs consist of questions, answers, short explanations of the correct answer and any relevant references for registrants’ feedback. **There should be about five (5) questions per SAM hour.**

- **Handouts** -- Pre-Meeting Handouts for attendees to reference are required for both Microscopic and Non-Microscopic presenters. Handouts can be uploaded through the ASC submission site.

- A **Conflict of Interest** disclosure is necessary for ALL speakers to complete and is collected through the ASC submission site.
